

2025 Summer Field Technician Positions for

POLLINATORS

Location: Iowa and/or Minnesota

We're looking to hire 5-6 temporary summer field technicians to collect data on plants and pollinators on several graduate research projects. Technician duties will include observations of pollinator-plant interactions; floral and plant surveys; collecting bees and hoverflies from nets and traps; and data processing including insect preservation for identification and data entry. Housing will be provided in Minnesota only.

Desired qualifications include: Working towards a bachelor's degree in biology, ecology, fisheries and wildlife, or a related field; comfortable working long hours in the field under potentially high heat and humidity; and prior experience with field work, including plant and pollinator surveys
