

PHD ASSISTANTSHIP:

Spatial Ecology and Monitoring of a Reintroduced Elk Herd

Join the WV Coop Unit at West Virginia University to conduct research on reintroduced elk in West Virginia in cooperation with the WV Division of Natural Resources. You'll work with a unique GPS dataset from nearly all elk within the population in the 9+ years following reintroduction. Possible research directions include investigating spatial responses to habitat management, creating movement models to improve disease surveillance, and evaluating monitoring strategies. Lots of flexibility to develop research questions related to your own interests!

Location: Morgantown, WV

Start Date: August 2025

Salary: ~\$32,000 + tuition waiver and health insurance

**APPLY BY
FEB 1, 2025**
