

PhD POSITION: Movement Ecology of Bighorn Sheep in Hells Canyon

The Picardi Lab in the Department of Fish & Wildlife Sciences at the University of Idaho is recruiting a PhD student to research the determinants of bighorn sheep movement decisions in the Hells Canyon metapopulation. This work will be conducted in partnership with the Idaho Department of Fish & Game and the Oregon and Washington Departments of Fish & Wildlife.

The successful candidate will analyze a long-term dataset comprised of VHF, GPS, and demographic data collected by our agency partners with the ultimate goal of developing a predictive model of bighorn sheep movements. The anticipated duration of the project is 4 years.

Location: Moscow, ID
Start date: January 8th, 2024
Compensation: \$27-32K/year
