International Wolf Center to award two fellowships

in 2025; application deadline is February 1, 2025

The International Wolf Center is seeking applicants for the 2025 Dr. L. David Mech fellowships. As an investment in the future of wolf research and science-based wolf education, each year, the Center awards up to two fellowships for undergraduate students or recent graduates interested in pursuing careers in natural sciences with an interest in wildlife. **Fellowship recipients receive a \$6,000 stipend and up to \$4,000 in support for field research expenses.**

Fellowship goals

- Reduce barriers to allow undergraduate students and recent graduates to directly engage in research and field work.
- Encourage students from diverse backgrounds to explore natural sciences/wildlife biology as a profession.
- Provide bridge support for early career researchers prior to graduate school.

The International Wolf Center uses science-based education to teach and inspire the world about wolves, their ecology, and the wolf-human relationship. Since our founding in 1985 by Dr. L. David Mech and others, the Center has sought to provide the latest scientific information about wolves to our visitors and program participants. We believe that continued investment in scientific discovery about wolves and other wildlife will lead to increased understanding of how to build a future where wolves and humans can coexist and thrive. We also understand that many barriers exist for students and early career researchers and hope these fellowships can facilitate access to people pursuing a wildlife biology career.

Application deadline: February 1, 2025

Fellowships Awarded: March 31, 2025

Term: April 1, 2025 through April 1, 2026
