STATE'S MINIMUM QUALIFICATIONS:

Education/experience requirements:

- The formal education equivalent of a bachelor's degree in microbiology or related field.
- Plus, two years of experience in laboratory analysis or a related field.

Knowledge of:

- Microbiological theories and principles.
- Methods and techniques of microbiological tests and analysis.
- Laboratory operations and equipment maintenance.

Ability to:

- Assign and coordinate work activities and monitor the performance of co-workers and/or subordinates.
- Perform microbiological tests and analysis.
- Calibrate and maintain laboratory equipment.
- Write descriptive results of analysis and maintain records.
- Prepare media, standards, and reagents.
- Analyze and verify data using confirmation and statistical procedures.

Preferred Qualifications:

- Experience handling animal bodily fluids, tissues, and microbiological cultures is preferred.
- Experience performing both conventional and real-time PCR is desired.
- At least one year of documented experience working within a formal quality management system authoring and revising controlled documents and performing root cause/corrective action analysis.
- The ability and willingness to regularly wear personal protective equipment and to comply with fit testing requirements is a fundamental requirement of this position.
- Vaccination against rabies will be required, as well as documented maintenance of titer.
- Laboratory positions involve precise, repetitive work in high-throughput.
- This position is on-site, essential and is not approved for remote work.
