Subject: Fish Culture Research Technician position at Rathbun

The Iowa DNR currently has a Natural Resources Technician 1 (NRT 1) position that is an integral part of our Fish Culture Research Team. This position contributes to the Iowa DNR's mission by assisting with applied research that will make Iowa DNR fish hatcheries more efficient, productive, and provide future direction. Increasing productivity at state hatcheries results in more high-quality fish for stocking into public bodies of water for the anglers of Iowa. The primary job duties of the successful candidate are fish culture, buildings, grounds, and equipment maintenance; and data collection and entry. The successful candidate will gain experience with single pass and recirculating aquaculture systems as well as pond culture. Species currently being researched are Walleyes and Muskellunge.

To read more about the job responsibilities and particulars of this position, go to the url below.
