**Botanist / Plant Ecologist**

Join us in contributing to cutting-edge applied research and making a positive impact to sustainable management efforts in the interior Pacific Northwest!

We are seeking dynamic and motivated individuals with expertise in botany and plant ecology to contribute to ongoing collaborative research projects. Successful candidates will join active projects including:

1. Collaborative research with the Oregon Department of Fish and Wildlife (ODFW) focused on mule deer forage and habitat availability and quality.

2. Research on the ecology, management, and restoration of First Foods, particularly Roots and Berries, in collaboration with the Confederated Tribes of the Umatilla Indian Reservation, Nez Perce Tribe, land management agencies, and non-governmental organizations.

Successful Candidates will have:

- A degree in botany, ecology, natural resources, rangeland sciences or a related discipline.
- Experience collecting ecological or natural resource data in the field.
- Experience, knowledge and/or training in plant identification and vegetation sampling techniques.
- Ability to collaborate effectively with diverse partners, including tribal communities, government agencies, and non-governmental organizations.
- Excellent communication skills and the ability to contribute to publications, reports, and outreach materials.
