Folks,

The Angelo Coast Range Reserve (ACRR), one of 41 such reserves in the University of California system, located in Northern California Coast Range along the Eel River, is seeking to hire a Reserve Steward. The work responsibilities are focused on reserve infrastructure and operations maintenance. The Steward also manages visitors to the reserve and often interacts with research groups, providing logistical support and assistance as needed in construction and installation of equipment. This is a full time, permanent position with full benefits. Housing can be provided. We seek individuals with experience or applicable skills in building and grounds maintenance. The Reserve includes about 8050 acres of mixed canopy mostly old-growth forest, dissected into steep hillslopes, and bordered by the salmon-bearing South Fork Eel River and its tributaries. It is intended to provide research, teaching, and outreach opportunities in a protected environment. The ACCR is affiliated with UC Berkeley and is frequently used by Berkeley faculty and students, but also by researchers across the US and elsewhere. Among the many projects at the Reserve, the ACCR is the home of the still operating Eel River Critical Zone Observatory.

Angelo Coast Range Reserve and the Eel River Critical Zone Observatory are described here: https://angelo.berkeley.edu/

Here is the link to the job description and application (please note that the job location is listed as the UC Berkeley campus- that is where is it administered. The Reserve Steward will be based at ACRR).

DIRECTIONS:
1. Select the link to access our careers site.
2. Sign In to access your account or if you are not an existing user select the New User link to create one.
3. Review the job description and select the Apply button to begin your application.
