

PhD Assistantship: Wild Turkey Population Dynamics

About the Position:

A PhD position is available in the WV Cooperative Fish and Wildlife Research Unit at West Virginia University to conduct research on wild turkey population dynamics as part of a statewide research project, with the potential for multi-state collaboration. Work with large datasets with flexibility to develop additional management, ecological, or quantitative-driven questions related to spatial ecology, predator-prey dynamics, model development etc.! This is a great opportunity to be involved with a large-scale project with state, federal, and non-profit collaborators.

Logistics:

Start Date: August 2024

Location: West Virginia University (Morgantown, WV)

Salary: ~\$26,500 + tuition waiver and health insurance
