This position is for our Wildlife Biologist, stationed at Duck Creek Conservation Area. Duck Creek is one of our intensively managed wetland areas that annually sees 4,000-5,000 hunter days with up to 10,000 ducks harvested. The area has a diversity of habitats ranging from moist-soil impoundments, green tree reservoirs, and unimpounded bottomland hardwoods. Within the district, there are upland habitat management responsibilities as well. It’s a great opportunity for anyone who is passionate about managing wetlands for waterfowl and other wetland dependent wildlife. Please reach out to the hiring supervisor, Ryan Dirnberger, or me if you are interested in learning more about the job.

Wildlife Management Biologist (mo.gov)

Thanks,

Kevin Brunke
Regional Resource Management Supervisor
2302 County Park Drive
Cape Girardeau, MO 63701
